SUPPLEMENTARY INFORMATION:

I. Abstract

The purpose of this survey is to study the public's attitudes regarding: 1) the Census Bureau's planned use of administrative records in the 2000 census and 2) a proposal to collect social security numbers for each household member in the decennial census. In the design for the 2000 census, the Census Bureau plans to expand the use of administrative records to estimate characteristics of nonresponding households, supplement missing data for respondents that return incomplete forms, and estimate the number of persons missed within households. Collection of social security numbers would assist efforts to accurately match administrative records information. This research, in

conjunction with results from an earlier survey, will enable the Census Bureau to assess the public's attitudes.

I. Method of Collection

Telephone interviews will be conducted using an automated survey instrument and a random digit dialing sampling design.

III. Data

OMB Number: Not available.

Form Numbers: The automated survey instrument will not have a form number.

Type of Review: Regular submission.

Affected Public: Individuals and households.

Estimated Number of Respondents: 1,200.

Estimated Time Per Response: 15 minutes.

Estimated Total Annual Burden Hours: 300.

Estimated Total Annual Cost: \$91,900.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection technique or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau, in preparing a Master Address File (MAF) for the 2000 Decennial Census and on-going census surveys, is collecting data on the prevalence of non-city style addresses and whether governments are establishing or planning to establish city-style addresses by 1998. The Census Bureau will use this information to make decisions about 2000 decennial census enumeration and processing methodologies. Information from the survey also will accelerate their city style addressing in conjunction with the US Postal Service. The information for this survey will come from county personnel in the non-New England states and Minor Civil Division personnel in the New England states. The regional office geographers will conduct the survey by telephone from the regional offices. This is done under authority of Title 13, United States Code, Section 141 and 193.

II. Method of Collection

The data will be collected via telephone interviews.
